

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph at page 3, lines 2-8, with the following rewritten paragraphs:

-- FIGS. 4, 5, and 6 show another conventional securing seat for a filtering cylinder. The securing seat 40 is made from soft plastic material and the inner edge of the securing seat 40 is protruded with an inverted L-shaped holding plate 45 so that the top face of the securing seat 40 ~~[[is]]~~ has an engaging slot ~~[[40]]~~ 46 for holding the filtering cylinder 10, as shown in FIG. 5. Thus, the filtering cylinder 10 can be mounted onto the cylinder seat 50 having an extended holding section 55 via the securing seat 40, as shown in FIG. 6. --
